

Manual TVT851 Mini Tennis System 18m

Content:

- 18m net incl. net cable
- 2 pillars
- 1 carabiner
- 1 tension fixer
- 1 black stick

How to build up the system?

1. Roll out the 18m tennis net from the fence behind the baseline to the tennis net of the tennis court
2. Use the carabiner to fix the 18m net in the middle of the tennis net, either on or just below the netband. Before you do so make sure the tennis net of the tennis court is tensioned appropriately
3. Use the tension fixer and the black stick to fix the net on the fence:
 - Pull the cable through the little hole in the black stick
 - The black stick needs to be placed on the outside of the tennis court on the fence
 - Use the tension fixer by pulling the cable through the tension fixer in order to create the required tension
 - The black stick and the tension fixer are fixed on the fence on the outside of the tennis court
4. Place the pillars at 6m and 12m in order to create the required height along the length of the 18m tennis net
